

FS-240

Nr. O-111

Water-dilutable, alkaline industrial degreaser with fast and effective action, contains silicates

Packaging:

- 25 L barrel
- 200 L barrel
- Another packaging on customer's request

Application:

All industry sectors, including the food industry. Particularly well-suited to contamination in the wood and metal industries. It removes resin, soot, rust deposits, greases, oils, fuels and softens very difficult and persistent dirt so that it is easy to remove.

Properties:

- water-dilutable in the proportion of 1:10,
- minimal odour,
- does not damage most paints and rubbers,
- very high cleaning efficiency,
- removes even seized dirt,
- chemically stable.

How to use:

- the product can be used in a sprayer or by immersion method;
- check before use whether it does not react with the cleaned material;
- dilute the product depending on the degree of soiling, proportions 1:0–1:20;
- spray on the cleaned object, wait 30 seconds and rinse thoroughly with water under pressure or wipe with a cloth;
- do not allow the product to dry on the cleaned object.

Technical data:

Colour	dark yellow
Odour	faint, distinctive
pH	12,8
Freezing temperature	< 0°C
Flash point	non-applicable
Flammability	non-flammable
Explosive properties	does not show
Oxidising properties	does not show
Density	1115 kg / m ³
