

KW-300A

Nr. O-116

An aerosol product, high-quality industrial cleaner with a wide range of applications.

Packaging:

- Carton of 10 aerosols x 500 ml
- Another packaging on customer's request

Application:

The product cleans disc and drum brakes, clutch elements, glued and sealed surfaces from grease, oil and dirt. Effective in degreasing and cleaning elements made of metals - it dissolves and effectively removes dirt from fat, soot, persistent deposits, industrial dirt, dust block and others.

Properties:

- has excellent cleaning properties;
- a wide range of applications. High tolerance for many materials;
- removes stubborn dirt;
- evaporates very quickly;
- easy to use.

How to use:

- spray on the cleaned material;
- wait until the rest of the agent evaporates;
- if necessary, rinse thoroughly with water under pressure or wipe with a cloth.

Technical data:
