

## KW-300

Nr. O-116

High-quality industrial cleaner with a wide range of applications

### Packaging:

- 25 L barrel
- 200 L barrel
- Another packaging on customer's request

### Application:

The product cleans disc and drum brakes, clutch elements, glued and sealed surfaces from oil and dirt. Effective in the degreasing and cleaning elements made of metals - it dissolves and effectively removes dirt from fat, soot, persistent deposits, industrial dirt, block dust and others.

### Properties:

- has excellent cleaning properties;
- a wide range of applications. High tolerance for many materials;
- removes stubborn dirt;
- evaporates very quickly;
- easy to use.

### How to use:

- the product best applied in spray;
- spray on the cleaned material;
- wait until the excess of the agent evaporates;
- if necessary, rinse thoroughly with water under pressure or wipe with a cloth.

### Technical data:

|                           |                              |
|---------------------------|------------------------------|
| Colour                    | colourless                   |
| Odour                     | distinctive / solvent-like   |
| pH                        | non-applicable               |
| Freezing temperature      | non-applicable               |
| Flash point               | < 23°C                       |
