

## REL-Easy

*Nr. A-110*

An aerosol product, excellent penetrating, multi-purpose lubricant with the addition of molybdenum disulphide.

### Packaging:

- Carton of 24 aerosols x 400 ml
- Another packaging on customer's request

## Application:

The product loosens rusted bolts, nuts, locks and hinges. The agent lubricates and protects. It penetrates corroded, rusted and frozen parts instantly, i.e. pipe connectors, nuts/bolts, valves, locks and tools. It contains molybdenum disulphide. MoS<sub>2</sub> improves penetrating properties, high lubricity, good adhesion to metal substrates and supports extreme loads. It cannot be squeezed out and protects against corrosion. It eliminates seizing, slipping and deformation.

## Properties:

- dissolves rust;
- displaces moisture;
- prevents corrosion;
- it is not aggressive towards most materials;
- easy to use;
- leaves a protective layer.

## How to use:

- spray on a seized screw connection;
- wait a moment (5-30 seconds), wipe off the excess with a cloth;
- easily unscrew the screw connection;
- if necessary, rinse thoroughly with water under pressure or wipe with a cloth.

## Technical data:

Colour	colourless
Odour	distinctive
pH	non-applicable
Freezing temperature	non-applicable
Flash point	- 97°C
Boiling point	- 44°C
Explosive properties	does not show
Auto-ignition temperature	not self-igniting
Density	0,7 g / cm <sup>3</sup>
